

DREXEL SMART HOUSE

What is the “Smart House”?

Drexel Smart House is a multidisciplinary student-run organization

We will be retrofitting an existing house to be a living-laboratory. The house will be a platform for testing innovations in the areas of energy, health, environment, interaction, and lifestyle.

We are currently working to retrofit an existing lab in the Alumni Engineering Laboratories. We are collaborating with EWB, MAX Group, and the COE to design a suitable workspace for sustainability oriented research and development.

“Learning and innovation go hand in hand. The arrogance of success is to think that what you did yesterday will be sufficient for tomorrow.”

- William Pollard

We are actively recruiting members from all colleges. Do you want to be involved in a world changing movement? Do you want real world experience in research, design, finances, information management, public relations, or technology commercialization?

Join our ranks.

Join Drexel Smart House and Save the World.

We have the faculty. We have the house. We need soldiers.

They’re doing their part. Are you?
